

MOBILE KINO

Pop-Up Cinema for Hire

Mobile Kino is a Berlin based events company specializing in pop-up cinema events.

We create temporary cinema spaces in unusual locations such as beer gardens, rooftops, clubs, cafes, or at your company office headquarters. Our team can set up a full size cinema in any environment with fully transportable audio and projection equipment. We work with private companies, brands, film festivals, film distributors and non profit organizations.

Mobile Kino can fully organize a special film screening for private events. We work with German and international film distributors to gain access to the latest films, as well as classics. Our events coordinator can source the film rights to a selected film, find a suited venue, negotiate a fair venue rental price, and organize extra equipment or entertainment as necessary.

Mobile Kino has worked with many well established companies who wish to reward their staff, impress clients or regular public with a private cinema screening. Here are some of our clients:

What's included in a private screening package?

We can tailor a package that suits your company's needs. We have different cinema equipment that is suited to fit any sized room. A typical event package includes the rental of a venue, the cost of the film license and other fees such as GEMA.

The package includes a Full HD cinema projector, a fully amplified speaker system with microphones, fold up chairs, stage lighting and a pop-up bar with popcorn machines. Our team needs only a few hours to set up the cinema space, and one technician to operate the projection system.
